# SIGNATURE FULL-SIZE

## GLASS RACKS Features

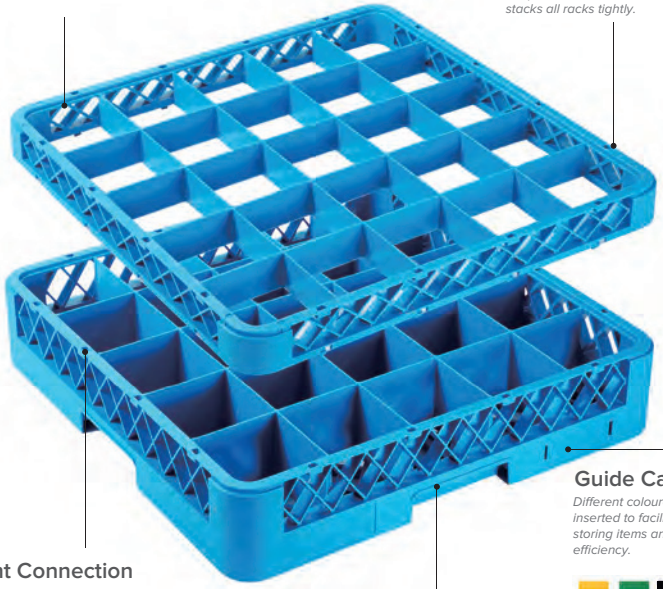

• A complete selection of racks and accessories that provide outstanding strength, adaptability, versatility, and durability. An unbeatable value in today's foodservice operations.

### Open Profile

*Allows top-to-bottom and side-to-side washing, making the glassware cleaner. Allows more air to circulate through the racks and makes faster drying and safer storing.*

### Stackability

*Snap-fit construction shortens assembly time, and stacks all racks tightly.*

### Tight Connection

*Snap-fit extenders will not loosen or rust over time like screws and will not come apart.*

### Guide Cards Groove

*Different coloured cards can be inserted to facilitate identifying storing items and improve work efficiency.*

### Convenient Handle

*The handles on all four sides of the racks are convenient for safe delivery. Textured surface and convenient handles can avoid scratches when carried.*

# GLASS RACKS SPECIFICITIES

## EFFICIENT WASHING

Warewashing can be labor intensive. If not well managed, it is likely to hurt your operation's bottom line and add unnecessary frustration. However, labor and efficiency is not the operator's only problem. The quality of your warewashing can directly effect your customers' health and the reputation of your establishment. If an effective system of cleaning and sanitation is not upheld, you may be facing risks on a daily basis that could jeopardize the future of your business.

### Efficient Washing

Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying. Long-lasting polypropylene are built to withstand chemicals and high temperatures up to 200°F (93°C).

### Open Wall Design

Open profile facilitates superior washing, complete rinsing, and fast drying

### Textured Finish

Non-slip textured finish on outside walls reduces scratches to keep racks looking new, improve durability, and provide a secure grip

### 4-way Tracking

Easy dish machine loading from any side without the need to rotate racks

## DISCOVER SAVINGS

- Less Water
- Less Energy
- Fewer Chemicals
- Less Waste

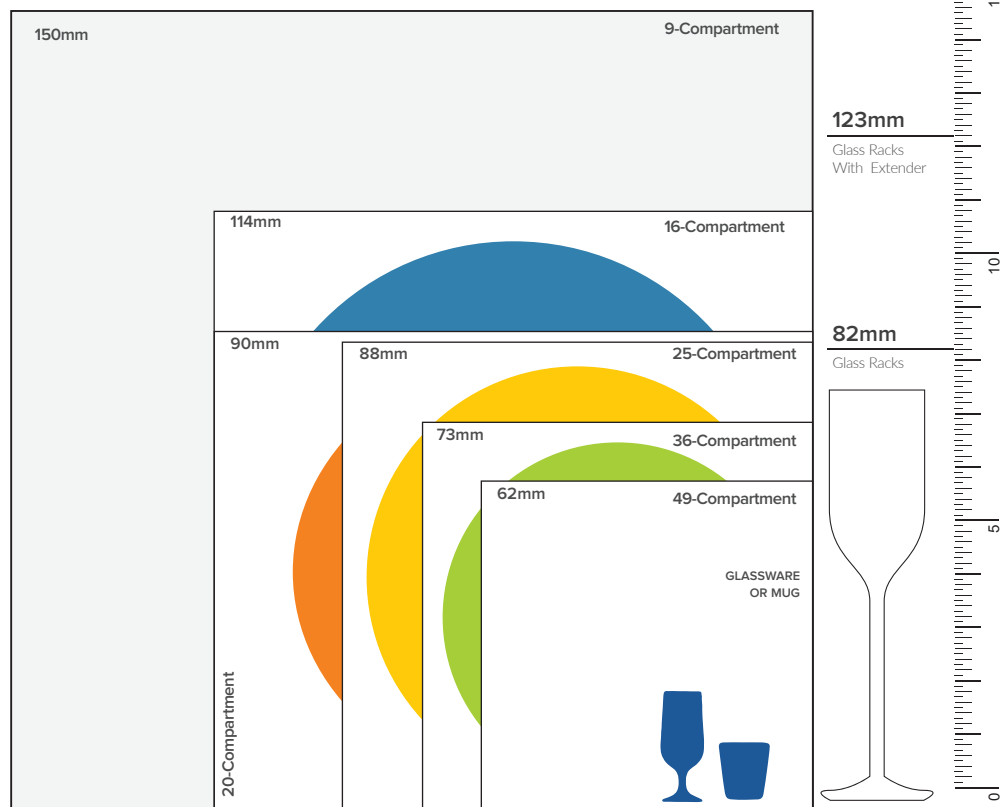

# Glass Racks

## Glass Rack Sizing Guide Instruction

1. Place glass upside down on top of the middle circle of the sizing guide, center of the glass should be over the center of the guide.
2. Look down on the base of the glass.
3. Note the smallest square on the guide where the largest outside diameter of the glass lines up completely within the square without touching it. That is the number of compartments our rack needs to have.
4. Place lip of glass against the base line of the vertical guide on the right-hand side of the page with the base/foot of the glass pointing straight up towards the top of the page.
5. While holding the glass against the vertical guide, note where the base/foot of the glass lines up on the vertical guide. The next line above the base/foot on the guide indicates the number of extenders your rack will require.
6. Glasses with a maximum height exceeding 246mm will need more than five extenders. Each extender adds approximately 40mm of additional height to the inside compartment of the rack.

## CLOSED GLASS RACKS SPECIFICITIES

### EFFICIENT WASHING

Ideal for storage and transportation to events, the rack's closed sides provide optimal protection against dust, bacteria, and insects. These convenient closed sides and their removable solid lids (sold separately) provide your employees with the opportunity to use the glasses between events without tedious re-cleaning. Unlike glassware stored in open side shelves, the closed design prevents clean glasses from getting dirty. Chemical, impact, and heat resistant for durability.

#### Efficient Washing

Open inside compartments provide thorough circulation of water and cleaning solutions and promote quick and thorough drying. Long-lasting polypropylene are built to withstand chemicals and high temperatures up to 200°F (93°C).

#### Sanitary Storage

The closed outer wall can prevent fingers and contaminants entering.

#### Textured Finish

Non-slip textured finish on outside walls reduces scratches to keep racks looking new, improve durability, and provide a secure grip.

#### 4-way Tracking

Easy dish machine loading from any side without the need to rotate racks.

## Glass Racks

## Seasoned Cast Iron Skillet

- Cast iron dishes with a black surface obtained thanks to the firing process.
- Ideal for serving hot dishes.
- The thick bottom slows down the cooling of food.
- Double-sided grill hob recommended for standard gas and electric burners.
- Cast ironware should be rinsed and dried before use; after use, wash them while still warm, preferably with dishwashing liquid, using a brush; always lubricate with vegetable oil after drying.

## Easy to adjust and install

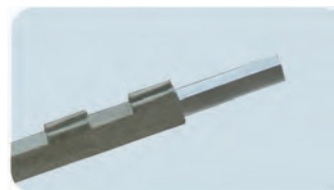

It's easy to adjust and install.  
With different sizes (3 heights, 4 widths, 6 lengths),  
space utilization is highly increased.  
The nets can be adjusted up or down by 100  
millimeters with disassembly.  
Shelves can be built to U-shape units with corner  
connectors.

## Absolutely firm, durable and stable

Made of a steel core and polypropylene.  
Inner steel provides high intensity and durability.  
Exterior PP is anti-corrosion and break-resistant.  
Post connectors provide exceptional stabilization.

## Never rusty

Can be used anywhere, no matter moist or dry  
weldless, never rusty.  
Resists corrosion by brine or marine air.  
Suitable for coolers and freezers, available  
under -38 C.

## Basic Unit

The components of shelf can be formed into various specifications of basic units.

Vented Basic Unit

Solid Basic Unit

## Add-on Unit

When added to a basic unit, the traverses on the first and second unit share the middle post. As a result, only two additional posts, instead of four posts or any add-on clips, are needed.

## Corner Unit and U shape Unit

Corner connectors can build corner units and U-shape units. Traverses snap onto corner connectors just like they snap onto the dovetails of the posts.

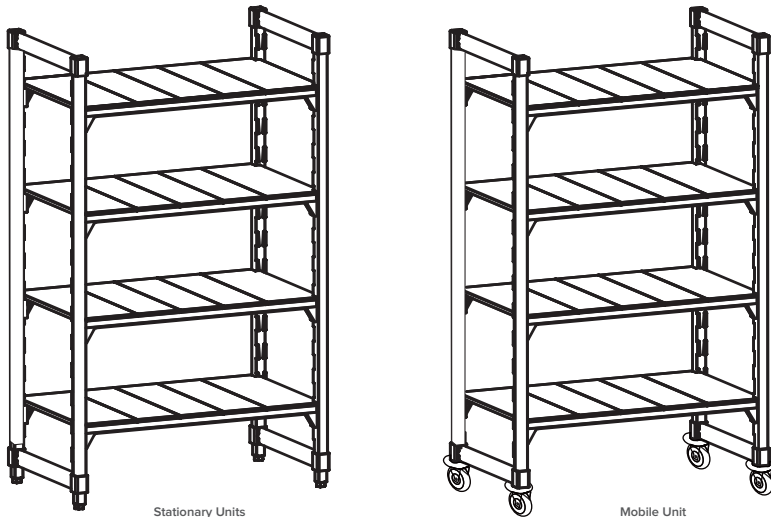

## Mobile Unit

Inserting the specialized bolts into the casters to change the storage shelves into the move aluminum shelving system. Mobile units are unsuitable to be used as transporting cart.

# High Density Mobile Shelving Storage System

- Maximum storage capacity can be achieved by forming a storage channel in all available space.
- The mobile shelving storage system is composed of the basic units on the raised track, with high density movable shelves in the middle.
- Tracks are easy to be installed without drilling or bonding.

The track conveniently connects to the bottom of stationary shelving, no bolts or drilling into the floor are required. Using the connecting bolt to fasten the track.

Raised track provides a smooth surface for mobile units. It ensures dirt will not get trapped, and it is easy to clean. Shelves unit with heavy weight lands can roll smoothly on the track.

Grooved casters roll easily on raised track, which can be used on any surface. The caster with a bumper can provide protection.

# High Density Mobile Shelving Storage System

## Caster

High Density Mobile Unit includes 4 High Density Casters with 4 High Density Donut Bumpers. Weight bearing capacity of High Density Mobile Unit is 340kg. All necessary hardware is included in the track kit.
