

ECO SHINE

Water-Based Stainless Steel Polish

PROPERTIES

EcoShine is a nonaerosol, water based, stainless steel polish that contains no solvents or butyls. **EcoShine** forms a long lasting protective coating that repels water, prevents penetration of harmful liquids and retains its gloss indefinitely. Provides long lasting luster on metal surfaces and doesn't leave a greasy film.

Eco Shine cleans lightly soiled surfaces. Simply spray on and polish to an even sheen for a like-new appearance. Leaves a barrier against water and dirt that makes cleanup much easier.

Eco Shine brings a protective luster to any metal surface. Use it on your walk-in coolers and freezers, service-line equipment, milk machines, coffee machines, exhaust hoods, heat lamps, brass, chrome, aluminum-any place you have metal that needs a shine.

USE DIRECTIONS

If surface is heavily soiled, first use **Lime-A-Way** for mineral soils or **Greasecutter Plus** for organic soils. Then use **Eco-Shine** following directions below.

1. Spray **Eco-Shine** on area to be cleaned.
2. Wipe off with a clean dry cloth until shiny.

For emergency medical information call Ecolab: 001 1 651 222 5352

Consult your Ecolab Representative for specific use instructions and recommended dispensing equipment. For cautionary and first aid information, please refer to the Safety Data Sheet (SDS) or product label.
