

EFFECTIVE DEGREASER. MADE SAFER*.

Greaselift Degreaser

- ▲ Penetrates grease and lifts it from surfaces
- ▲ Requires no gloves or goggles
- ▲ Foaming for vertical clinging
- ▲ Aluminum safe
- ▲ Biodegradable

Effective degreaser that requires no gloves or goggles to clean ovens, grills, stove hoods and vents.

*When compared with caustic degreasers. Greaselift is non-corrosive and less irritating.

Greaselift features a unique technology that actually penetrates tough, baked on grease and lifts it away from the surface. It is a powerful degreaser, even though it does not require gloves or goggles to use. It is available in ready-to-use bottles or as a concentrate that can be dispensed into reusable spray bottles, which helps significantly reduce packaging waste. Greaselift is biodegradable, has no noxious odors, and will not damage aluminum surfaces.

DIRECTIONS:

1. Spray Greaselift onto warm (120°F/49°C) surface with carbonized grease to be cleaned. Cover soiled areas completely with foam.
2. Allow Greaselift to penetrate grease deposits for 1-5 minutes. Do not let product dry on surface.
3. Wipe off dissolved and loosened grease with a scrub pad or a damp cloth.
4. Rinse surface with clear water.

NOTES:

Greaselift does not require gloves or goggles. Caution should be used when cleaning hot surfaces.
