

Products Assembly

⚠ DO NOT USE A METAL HAMMER FOR ASSEMBLY

1 Connect two posts by using a set of post connectors according to the direction of arrow. (A rubber hammer is recommended when assembling)

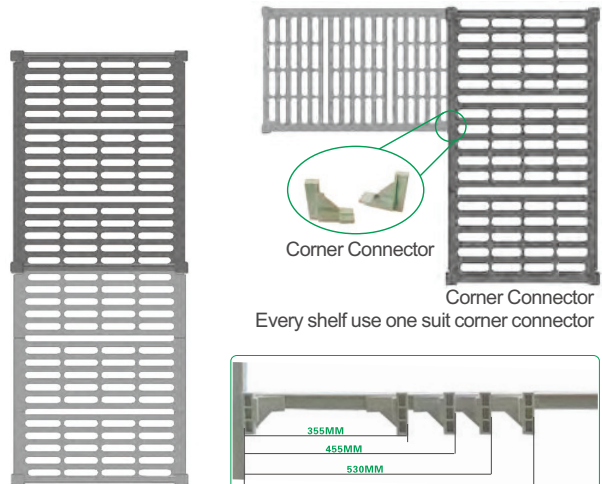

Easy to be installed with a slot.

2 To choose the proper height according to the sizes of traversers. Aiming at the slot of posts when installing. It can be adjusted in 100mm(4") increments.

3 Place shelf plates on the traversers. First to put the plate on the side of traversers, then you can put the plate on the middle place of traversers according to the different sizes.

Every shelf use one suit corner connector

Dropped extender
The basis of aircraft and dropped extender can be shared with the same post.

4 Add an additional unit by connecting two more parts with post connectors and then setting traverses onto the dovetails on the posts.
The traverses on the first and second unit share the middle post, place shelf plates on traverses to complete the second unit. Using corner connectors to add an additional unit.
